

IMF - White Paper Digital Patronage

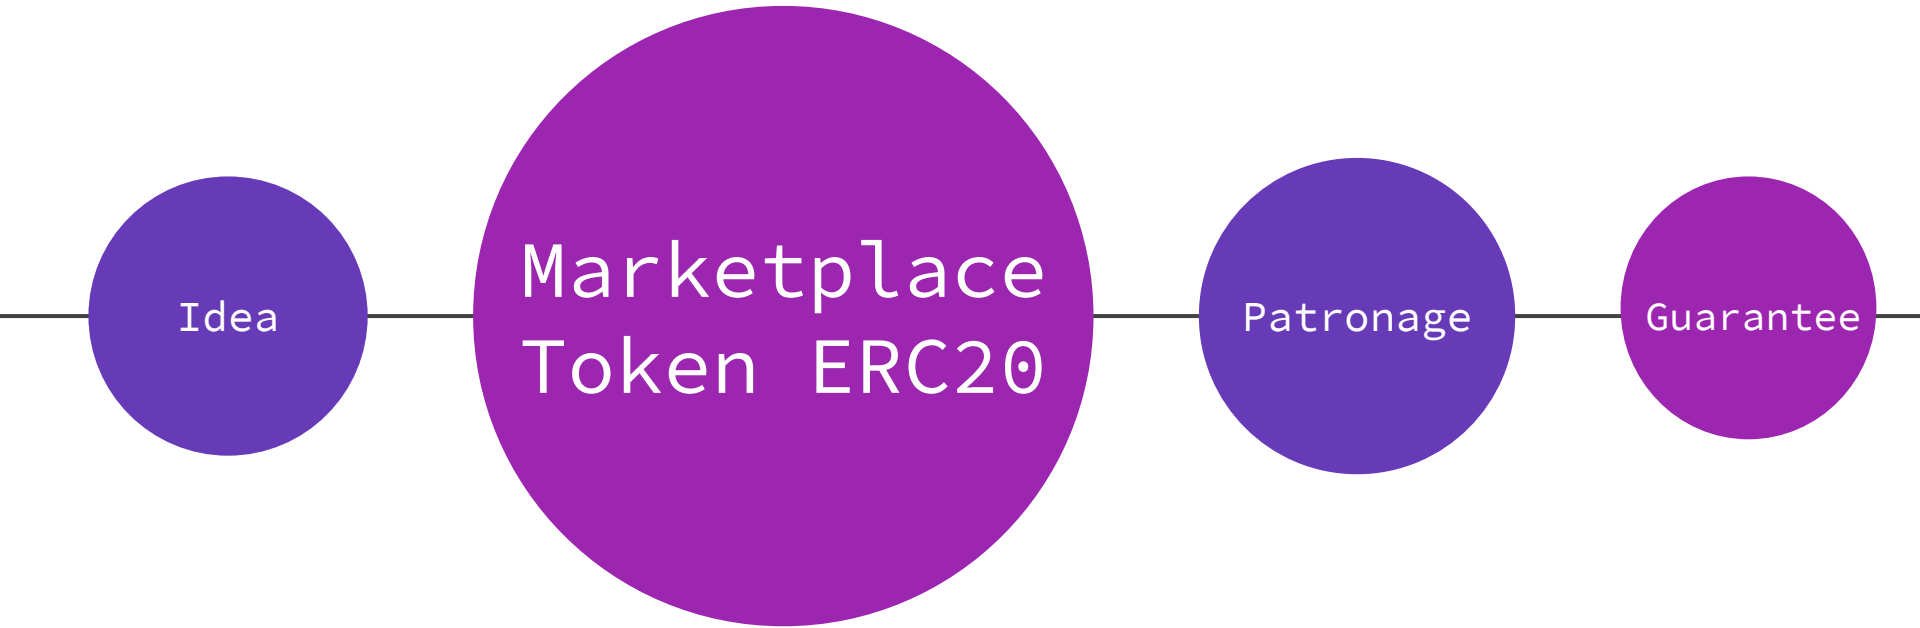

Invest in digital experiences

Token ERC20, Blockchain, Marketplace, Digital Patronage

Now thanks to our Blockchain and tokenization processes we can expand the scope without limits and create a completely new digital world!

Enter in the Marketplace regulated by our Blockchain, the virtual meeting place for those who want to carry out their own project and those who can guarantee access to credit by believing in your idea! Create the Smart Contract Digital Patronage based on the ERC20 compatible Token created by our Blockchain and payable in ETH, EUR and USD!

Skills and competencies

Smart Contract, Token ERC20, Digital Patronage

Digital Patronage

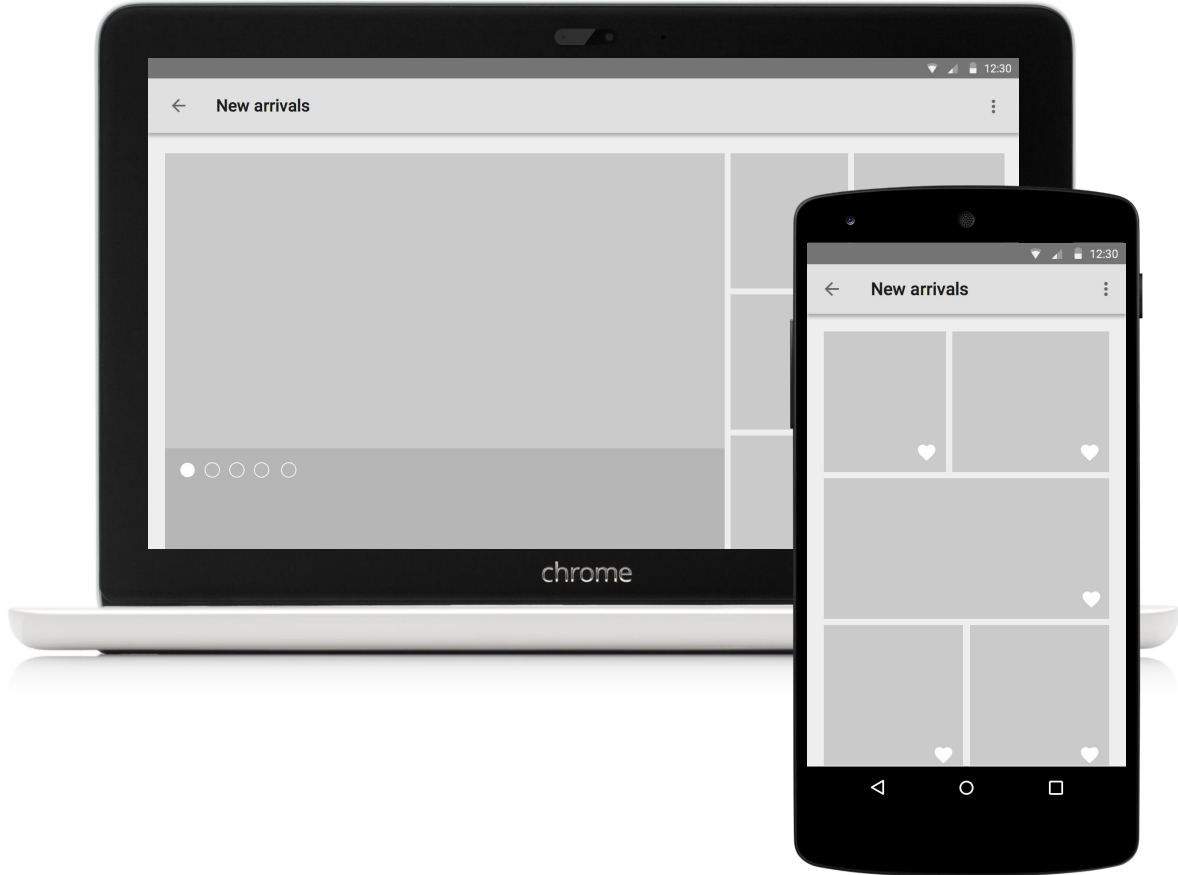

We build standard ERC 20 token (compatible with Ethereum and therefore salable in ETH).

— — —
Smart Contract:

When you request a guarantee for the credit, you can obtain a digital patronage token (solidity smart contract) in the marketplace that meets the necessary guarantees and paying for our service in ETH.

Marketplace: meeting between demand (public or private body that needs guarantees) and offer (owners of tokens with guarantees from third-party institutions).

No intermediation, information verification and direct transactions!

Digital Asset

DPHBT ERC20 token

1 billion tokens available!

Guarantees

36BTC placed as a guarantee for the Marketplace and the Ecosystem.

Invest in our **DPHBT ERC20 tokens** and sell them as collateral with your Smart Contract in our Market Place!
